

# OUR SERVICE

## BENEFITS OF VIRTUAL REALITY:

### Improved well-being

Wonderful VR environments replicate the calm gained from being outdoors, as well as the wonder of visiting beautiful places - reducing anxiety and frustration, often resulting in an improved interaction with care givers and distraction from pain. 🧑

[Click to watch video demonstration](#)

### Recall past memories

Residents can recall past memories with our great variety of scenes - from seas 🌊, lakes and rivers to countryside villages 🏡 and zoos 🦒 - as well as giving them something to talk about with family and caregivers.

### Easy to set-up and use

We know carers are short of time which is why our VR is designed to be as easy-to-use and portable as possible. Onboarding is painless and we give virtual training on how to use and administer VR. 😊

### Improved physical health

Combining our virtual walks with a leg exerciser can help improve the physical health of residents - getting the legs moving as if they were walking along in the scene! 🚶

It's so nice feeling the hold on my hand loosen as residents relax... someone even cried when the specs were taken off!

— Eileen Warbutt. Wellbeing Manager, Guild Care.

## WHAT DO OUR PACKAGES INCLUDE?

### CONTENT

- 🌿 Wonderful new VR content every month
- 😊 Designed specifically for this audience

### TECHNOLOGY

- 📱 Our customised VR tech is designed for quality and accessibility in care homes

### TRAINING

- 👁️ Virtual training session, teaching you how to use our VR and get your residents started

### SUPPORT

- 💻 In house tech experts provide you with timely guidance and technology consultancy
